

Power Anytime, Anywhere

## TI1000 GPU-24

### Perfect Aircraft Ground Power/Starting Solution

- Tesla's lightest unit that provides 1500 peak starting amps
- Ideal for remote locations and hangar power
- Eliminates hot starts

### Safe and Easy Operation

- One person can maneuver and operate the unit
- Safe for flight, non-hazardous, dry-cell technology
- "Push to Test" feature provides instant state of charge

### Pure Power

- No spikes or surges
- 24 VDC for engine starting
- 25 amps at 28.5 VDC for avionics and troubleshooting

### Maintenance-free Performance

- Operates and charges from 110/220 VAC power worldwide
- 5 to 7-year service life with 2-year warranty
- Backed by an experienced team of customer service professionals
